Course Details

1. Risk Identification, Assessment and Evaluation
2. Risk Response
3. Risk Monitoring
4. Information Systems Control Design and Implementation
5. IS Control Monitoring and Maintenance
6. Exam Preparation, Practice Exam, questions-answers

Prerequisites

- Participants must possess basic knowledge about the different domains that will be addressed in the CRISC exam. The course is an intensive review in preparation for the examination, not basic training;
- Participants must understand English since the provided documentation is written in that language.

How do we do it?

- This training is based on theory, exam preparation questions and homework's
- A four hour practice exam to measure the level of knowledge of the participants
- To benefit from the exercises, the number of training participants is limited

CRISC Professionals

- Are highly qualified, experienced professionals
- Build greater understanding about the impact of IT risk and how it relates to the overall organization
- Assure development of more effective plans to mitigate risk
- Establish a common perspective and language about IT risk that can set the standard for the enterprise

CRISC Professionals ... in numbers.

More than 17,000 professionals have earned the CRISC certification since it was established in 2010.

CRISC CERTIFICATION

GLOBALLY RECOGNIZED EXPERTISE IN RISK AND INFORMATION SYSTEMS CONTROL
